Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

This application 10/044,155 has been examined. Claims 1-6 are pending.

Claim Objections

1. Claim 6 is objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim, or amend the claim to place the claim in proper dependent form, or rewrite the claim in independent form.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-5 are rejected under 35 U.S.C. 102(e) as being anticipated by Dervisoglu et al. (Dervisoglu), U.S. Publication 2003/0131327.

4. Pursuant to claim 1-3, Dervisoglu discloses designating a plurality of test points in the IC from which the test signals are generated (§§ 12-14); designating a hierarchy of a plurality of regional levels and sub-levels within the IC (§19); distributing a hierarchy of a plurality of multiplexers across the IC (Fig. 2), each multiplexer being local to one of the regional levels and sublevels (§ 23); connecting a lowest level portion of the multiplexers to the test points to receive the test signals (§23); connecting a mid-level

portion of the multiplexers to other multiplexers to receive selected portions of test signals therefrom (claims 1 and 18); and connecting a highest level one of the multiplexers to the output locations to supply a final one of the selected portion of the test signals (claims 1 and 18).

5. Pursuant to claims 4 and 5, Dervisoglu discloses the integrated circuit product on which the method of claims 1-3 operates (Figs. 2, 8B, and 10).

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Please reference the PTO-892 for a complete listing.
